SUMMARY

DevOps/SRE Principal Engineer with 9+ years of experience building scalable, secure, and reliable cloud platforms across AWS and OCI. Expert in Kubernetes, Docker, CI/CD automation, observability, and large-scale cloud migrations. Currently architecting AI-driven operations at Oracle — building multi-agent RCA systems with MCP integrations and ML-based log anomaly detection. Pursuing Master's in AI.

TECHNICAL SKILLS

Programming: Python, NodeJS, Java, Shell, PL/SQL

Cloud: AWS (ECR, EKS, ECS, S3, RDS, Lambda), OCI DevOps, IaC

DevOps/SRE: GitHub Actions, Jenkins, Docker, Kubernetes, ArgoCD, Terraform, Artifactory, SonarQube, Snyk, Ansible, GitOps

Observability: Dynatrace, Grafana, CloudWatch, Kibana

AI/ML Ops: Multi-Agent Systems, MCP (Model Context Protocol), LLM Orchestration, Log Anomaly Detection (centroid-based ML), Automated RCA

Desktop Apps: Flet (Python/Flutter) **Mobile CI/CD:** Fastlane **Certifications:** Oracle DevOps Certified

PROFESSIONAL EXPERIENCE

Principal DevOps Engineer

Apr 2025 – Present

Oracle

- Architected a multi-agent RCA (Root Cause Analysis) system with specialized agent roles, an Agent Gateway for orchestration, and an MCP Gateway for tool access — deployed on a Kubernetes cluster in OCI VMs managed via GitOps with ArgoCD.
- Built custom MCP servers to give AI agents secure access to Jenkins, databases, log stores, and internal APIs — creating a unified tool ecosystem for automated operations.
- Developed a centroid-based ML model for log anomaly detection and scoring, automatically triggering the multi-agent RCA process when anomalies are detected in CI/CD pipelines.
- Built desktop applications using Flet (Python/Flutter) for internal tooling, including a GUI frontend for enterprise SCM migration from ClearCase to Git.
- Designed and automated CI/CD pipelines using Jenkins, Ansible, Python, PL/SQL, and Shell across 20+ services.
- Reduced CI/CD execution times by 35% through pipeline architecture redesign.
- Implemented repository governance, branch strategy, and workflow automation using Visual Builder Studio.

DevOps & L2 Support Engineer

Feb 2024 – Apr 2025

Santander Bank USA (TCS & Cervantes Group)

- Ensured high system stability across AWS and on-prem platforms through incident response.
- Utilized Dynatrace, Grafana, Kibana, CloudWatch, and Lambda for performance analysis.
- Improved application reliability through root-cause diagnostics and Python automation workflows.

Senior DevOps Engineer

Oct 2023 – Jan 2024

ALBO

- Implemented high-availability infrastructure using Kubernetes, Docker, EKS, ECS, and ECR.
- Automated deployments with Jenkins and Python, improving consistency and reducing human error.
- Migrated CI/CD operations from Bitbucket to Jenkins to standardize engineering workflows.
- Integrated Terraform IaC and GitHub Actions into multi-service deployment processes.

Head of DevOps

Jun 2022 – Oct 2023

MACROPAY

- Defined and scaled DevOps workflows across mobile, serverless, MVC, and middleware systems.
- Managed AWS releases using Lambda, EKS, ECS, EC2, S3, RDS, and DynamoDB.
- Automated pipelines with Jenkins and Terraform, reducing release time from hours to minutes.
- Oversaw platform administration including Firebase, Apple Connect, and Google Play Console.

DevOps Lead

Oct 2021 – Jun 2022

TV Azteca Digital

- Built CI/CD workflows for iOS and Android apps using Fastlane, AWS, GitHub Actions, and SonarQube.
- Automated multi-pipeline deployments using Jenkins, controlled via SmartSheet triggers.
- Increased mobile release frequency from weekly to daily.

DevOps Area Founder & Developer Lead

Jan 2018 – Oct 2021

AIONTECH

- Established and led DevOps processes using Docker, Jenkins, Artifactory, and SonarQube in AWS.
- Developed backend services using Java EE, SpringBoot, Camel, Hibernate, and JPA.
- Built full-stack platforms for BFSI, retail, and government clients.

Tester & Deployer

Jul 2015 – Jan 2018

AIONTECH

- Performed testing and deployments for financial institutions including HSBC and InvestaBank.
- Built Selenium automation frameworks for QA workflows.

EDUCATION

Master's in Artificial Intelligence | UNIR – Universidad Internacional de La Rioja | *In Progress*

B.S. Computer Engineering | IPN – ESIME Culhuacán | 2020

Digital Systems Technician | IPN – CECyT 9 | 2015
